editorial advisory board

A. D. Amar
Seton Hall University

G. Anandalingam
University of Pennsylvania

Jonathan F. Bard
University of Texas at Austin

Michael Bastian
Aachen, West Germany

Rajan Batta
SUNY at Buffalo

Oded Berman
University of Toronto, Canada

Lucio Bianco
University of Rome "Tor Vergata", Italy

Lawrence Bodin
University of Maryland

Israel Borovits
Tel Aviv University, Israel

Herwig Bruneel
Ghent State University, Belgium

Noel Bryson
Howard University

R. L. Bulfin
Auburn University

Wilfred Candler
World Bank

Tom M. Cavalier
Penn State University

Sohail S. Chaudhry
Villanova University

T. C. E. Cheng
Hong Kong Polytechnic, Hong Kong

Y. H. Chin
Tsing-Hua University, Taiwan

Eng Ung Choo
Simon Fraser University, Canada

Brian Conolly
Cambridge, England

James DeArmon
The Mitre Corporation

Richard F. Deckro
Air Force Institute of Technology

John Dinkel
Texas A&M University

Moshe Dror
University of Arizona

Fred F. Easton
Syracuse University

H. A. Eiselt
University of New Brunswick, Canada

E. A. Elsayed
Rutgers University

James R. Evans
University of Cincinnati

James O. Frendewey
Michigan Technological University

Moshe Friedman
University of Miami

Saul Gass
University of Maryland

Parviz Ghandforoush
Virginia Polytechnic Institute & State University

Jay B. Ghosh
University of Dayton

Bruce Golden
University of Maryland

Jatinder N. D. Gupta
Ball State University

Cengiz Haksever
Rider College

Michael Hanna
University of Houston—Clear Lake

Edward L. Hannan
Husted Hall Albany

Michael Harnett
Kansas State University

John Honig
Bethesda, Md

James P. Ignizio
University of Virginia

Mark H. Karwan
SUNY at Buffalo

Rex K. Kincaid
College of William & Mary, VA, USA

N. K. Kwak
St Louis University

Lawrence LaForge
Clemson University

Santi Lahiri
Winchester, Mass.

Judah Lando
Kfar Vitkin, Israel

Gilbert Laporte

List of Contents

NUMBER 1

Rainer Leisten	1	*A posteriori* error bounds in linear programming aggregation
P. C. Chu and **J. E. Beasley**	17	A genetic algorithm for the generalised assignment problem
Rex K. Kincaid	25	A molecular structure matching problem
V. Daniel R. Guide Jr and **Rajesh Srivastava**	37	An evaluation of order release strategies in a remanufacturing environment
Ali Amiri	49	Solution procedures for the service system design problem
Faruk Güder and **James L. Zydiak**	61	Non-stationary ordering policies for multi-item inventory systems subject to a single resource constraint and quantity discounts
Zhimin Huang	73	Bargaining, risk and franchising coordination
Amy Zhaohui Zeng and **Tianming Zhang**	85	A queuing model for designing an optimal three-dimensional maintenance float system
Call for Papers	I	

NUMBER 2

Rasaratnam Logendran and **Parthasarathi Ramakrishna**	97	A methodology for simultaneously dealing with machine duplication and part subcontracting in cellular manufacturing systems
Zilla Sinuany-Stern, **Israel David** and **Sigal Biran**	117	An efficient heuristic for a partially observable Markov decision process of machine replacement
Alan T. Murray and **Richard L. Church**	127	Solving the anti-covering location problem using Lagrangian relaxation
Jay B. Ghosh	141	Job selection in a heavily loaded shop
Chen Tsiushuang, Qi Xiangtong and **Tu Fengsheng**	147	Single machine scheduling to minimize weighted earliness subject to maximum tardiness
Andrew Mason and **Mikael Rönnqvist**	153	Solution methods for the balancing of jet turbines
Ching-Jong Liao and **Li-Man Liao**	169	Single facility scheduling with major and minor setups

Constantine Loucopoulos and **Robert Pavur** 179 Computational characteristics of a new mathematical programming model for the three-group discriminant problem

Chung-Hsing Yeh 193 A fast finite loading algorithm for job oriented scheduling

NUMBER 3

R. J. W. James 199 Using tabu search to solve the common due date early/tardy machine scheduling problem

A. Higgins, E. Kozan and **L. Ferreira** 209 Modelling the number and location of sidings on a single line railway

Chae Y. Lee and **Seon G. Chang** 221 Balancing loads on SONET rings with integer demand splitting

Roger B. Grinde and **Tom M. Cavalier** 231 A new algorithm for the two-polygon containment problem

Chris Tofallis 253 Input efficiency profiling: an application to airlines

Yong Shi and **Heeseok Lee** 259 A binary integer linear program with multi-criteria and multi-constraint levels

Ali Amiri and **Hasan Pirkul** 275 Routing and capacity assignment in backbone communication networks

NUMBER 4

Rahul Simha and **Amitava Majumdar** 289 An urn model with applications to database performance evaluation

Huan Li and **Yixin Zhu** 301 $M(n)/G/1/N$ queues with generalized vacations

M. Khalid, P. D. Vyavahare and **H. B. Kekre** 317 Analysis of an asymmetric polling system

Gündüz Ulusoy, Funda Sivrikaya-Şerifoğlu and **Ümit Bilge** 335 A genetic algorithm approach to the simultaneous scheduling of machines and automated guided vehicles

Ami Arbel 353 An interior multiobjective primal–dual linear programming algorithm based on approximated gradients and efficient anchoring points

A. M. Flitman 367 Towards analysing student failures: neural networks compared with regression analysis and multiple discriminant analysis

G. H. Chan 379 Eyeballing heuristics for dynamic lot sizing problems with rolling horizons

NUMBER 5

Y. Narahari, N. Hemachandra and **M. S. Gaur**	387	Transient analysis of multiclass manufacturing systems with priority scheduling
Darryn J. Reid	399	Enhanced genetic operators for the resolution of discrete constrained optimization problems
Jiafu Tang and **Dingwei Wang**	413	An interactive approach based on a genetic algorithm for a type of quadratic programming problems with fuzzy objective and resources
Bay Arinze, Seung-Lae Kim and **Murugan Anandarajan**	423	Combining and selecting forecasting models using rule based induction
Linda Salchenberger, Enrique R. Venta and **Luz A. Venta**	435	Using neural networks to aid the diagnosis of breast implant rupture
Bruce L. Golden, Gilbert Laporte and **Éric D. Taillard**	445	An adaptive memory heuristic for a class of vehicle routing problems with minmax objective
Ajay Singh and **J. MacGregor Smith**	453	Buffer allocation for an integer nonlinear network design problem
Frank G. Landram and **Bahram Alidaee**	473	Computing orthogonal polynomials
Rudolf Vetschera	477	A recursive algorithm for volume-based sensitivity analysis of linear decision models

NUMBER 6

J. R. Artalejo	493	Analysis of an M/G/1 queue with constant repeated attempts and server vacations
Kwang Jae Kim and **Hsien-Ruey Chen**	505	A comparison of fuzzy and nonparametric linear regression
Jože Rugelj and **Sandi Klavžar**	521	Distributed multicast routing in point-to-point networks
Fikri Karaesmen and **Surendra M. Gupta**	529	Duality relations for queues with arrival and service control
Hark Hwang and **Seong Whan Shinn**	539	Retailer's pricing and lot sizing policy for exponentially deteriorating products under the condition of permissible delay in payments
Rajendra S. Solanki and **Jyothi K. Gorti**	549	Implementation of an integer optimization platform using object oriented programming

H. W. Lee, D. I. Chung, S. S. Lee and **K. C. Chae** — 559 — Server unavailability reduces mean waiting time in some batch service queuing systems

Soung-Hie Kim, Byeong-Seok Ahn and **Sang-Hyun Choi** — 569 — An efficient force planning system using multi-objective linear goal programming

Nachimuthu Karunanithi and **Tamra Carpenter** — 581 — SONET ring sizing with genetic algorithms

NUMBER 7

Kim Fung Lam and **Jane W. Moy** — 593 — An experimental comparison of some recently developed linear programming approaches to the discriminant problem

Norman D. Curet — 601 — Applying steepest-edge techniques to a network primal-dual algorithm

Shanling Li and **Devanath Tirupati** — 611 — Impact of product mix flexibility and allocation policies on technology

Armin Scholl, Robert Klein and **Christian Jürgens** — 627 — BISON: a fast hybrid procedure for exactly solving the one-dimensional bin packing problem

Z. Khan, B. Prasad and **T. Singh** — 647 — Machining condition optimization by genetic algorithms and simulated annealing

Alfredo Marín and **Blas Pelegrín** — 659 — A branch-and-bound algorithm for the transportation problem with location of *p* transshipment points

Anito Joseph and **Noel Bryson** — 679 — Partitioning of sequentially ordered systems using linear programming

Rajani R. Joshi — 687 — A new heuristic algorithm for probabilistic optimization

NUMBER 8

Brian Borchers and **John E. Mitchell** — 699 — A computational comparison of branch and bound and outer approximation algorithms for 0–1 mixed integer nonlinear programs

P. Patrick Wang — 703 — Optimally scheduling *N* customer arrival times for a single-server system

Jiafu Tang and **Dingwei Wang** — 717 — A nonsymmetric model for fuzzy nonlinear programming problems with penalty coefficients

Mhand Hifi — 727 — An improvement of Viswanathan and Bagchi's exact algorithm for constrained two-dimensional cutting stock

Geon Cho, Dong X. Shaw and **Seong-Lyun Kim** — 737 — An efficient algorithm for a capacitated subtree of a tree problem in local access telecommunication networks

J. S. Finan and **W. J. Hurley**	749	The analytic hierarchy process: does adjusting a pairwise comparison matrix to improve the consistency ratio help?
Gerard J. Chang and **Pei-Hsin Ho**	757	The β-assignment problem in general graphs
Ravinder Nath, Balaji Rajagopalan and **Randy Ryker**	767	Determining the saliency of input variables in neural network classifiers
Bahram Alidaee and **Duane Rosa**	775	Scheduling parallel machines to minimize total weighted and unweighted tardiness
Jennifer Xie, Martin J. Fischer and **Carl M. Harris**	789	Workload and waiting time in a fixed-time loop system

NUMBER 9

Luis C. Dias, João P. Costa and **João N. Clímaco**	805	Conflicting criteria, cooperating processors—some experiments on implementing a multicriteria decision support method on a parallel computer
Hsiao-Fan Wang and **Ching-Chun Fu**	819	A generalization of fuzzy goal programming with preemptive structure
Bernard Gendron and **Teodor Gabriel Crainic**	829	A parallel branch-and-bound algorithm for multicommodity location with balancing requirements
Kun-Nyeong Chang and **Sehun Kim**	849	Channel allocation in cellular radio networks
Paulo M. França Vinícius A. Armentano Regina E. Berretta and **Alistair R. Clark**	861	A heuristic method for lot-sizing in multi-stage systems
Liang-Yuh Ouyang and **Kun-Shan Wu**	875	Mixture inventory model involving variable lead time with a service level constraint
Chae Y. Lee and **Seok J. Koh**	883	A design of the minimum cost ring-chain network with dual-homing survivability: a tabu search approach

NUMBER 10

Chiang Kao and **H. C. Tang**	899	Systematic searches for good multiple recursive random number generators
John T. Buchanan and **James L. Corner**	907	The effects of anchoring in interactive MCDM solution methods
Susan X. Li	919	Transaction-efficiency analysis of franchising arrangements through chance cross-constrained game theory

Liang-Hsuan Chen	937	Designing robust products with multiple quality characteristics
Miro Gradišar, Jože Jesenko and **Gortan Resinovič**	945	Optimization of roll cutting in clothing industry
Ali Allahverdi	955	Scheduling in stochastic flowshops with independent setup, processing and removal times
Takeo Yamada and **Mayumi Futakawa**	961	Heuristic and reduction algorithms for the knapsack sharing problem
Gin Hor Chan and **Kim Suan Chiu**	969	A simple heuristic for multi-product dynamic lot sizing problems
Beyime Tachefine and **François Soumis**	981	Maximal closure on a graph with resource constraints
Call for Papers	I	

NUMBER 11

Kwun Ik Cho and **Soung Hie Kim**	991	An improved interactive hybrid method for the linear multi-objective knapsack problem
Siddhartha S. Syam	1005	A model for the capacitated *p*-facility location problem in global environments
Ping Ji, W. B. Lee and **Hongyu Li**	1017	A new algorithm for the assignment problem: an alternative to the Hungarian method
J. N. D. Gupta, V. A. Strusevich and **C. M. Zwaneveld**	1025	Two-stage no-wait scheduling models with setup and removal times separated
Alok Aurovillian, Hong Zhang and **Malgorzata M. Wiecek**	1033	A bookkeeping strategy for multiple objective linear problems
Meltem Denizel and **S. Selcuk Erenguc**	1043	Exact solution procedures for certain planning problems in flexible manufacturing systems
Gilbert Laporte	1057	Modeling and solving several classes of arc routing problems as traveling salesman problems
Paul A. Savory and **Gerald T. Mackulak**	1063	An aggregation procedure for simulating manufacturing flow line models
Moncer Hariga and **Ali Al-Alyan**	1075	A lot sizing heuristic for deteriorating items with shortages in growing and declining markets
Sungyeol Kang and **Richard F. Serfozo**	1085	Maxima of sojourn times in acyclic Jackson queueing networks
N. Mladenović and **P. Hansen**	1097	Variable neighborhood search

NUMBER 12

Soung Hie Kim and **Byeong-Seok Ahn**	1101	Group decision making procedure considering preference strength under incomplete information
Sun Hur	1113	A note on varying the number of states in the arrival process of MR/GI/1 queue
D. K. Manna and **V. Rajendra Prasad**	1119	Pseudopolynomial algorithms for CTV minimization in single machine scheduling
Charles M. Macal and **Arthur P. Hurter**	1129	Dependence of bilevel mathematical programs on irrelevant constraints
Parag C. Pendharkar	1141	A fuzzy linear programming model for production planning in coal mines
Erik W. Dravnieks and **John W. Chinneck**	1151	Formulation assistance for global optimization problems
Ceyda Oğuz, Bertrand M. T. Lin and **T. C. Edwin Cheng**	1169	Two-stage flowshop scheduling with a common second-stage machine
Manuel Laguna, Rafael Marti and **Vicente Valls**	1175	Arc crossing minimization in hierarchical digraphs with tabu search
Linet Özdamar and **Hakan Dündar**	1187	A flexible heuristic for a multi-mode capital constrained project scheduling problem with probabilistic cash inflows
	I	Call for Papers
